Mateusz Kocik

Gdynia, Poland

Frontend developer with 3 years of experience specialising in building data-driven web applications using Vue.js. Currently working at Infermedica, contributing to the development of a medical application for doctors, focused on efficiently handling large volumes of medical data. In my free time, I enjoy climbing, especially bouldering, and playing board games.

EXPERIENCE

Infermedica — *Frontend Developer*

October 2022 - PRESENT

- Developed a web application for doctors to input and manage medical data, designed to handle large datasets efficiently using Vue.js and TypeScript.
- Worked closely with the UX/UI designer and backend team.
- Integrated RESTful APIs into the frontend architecture.
- Utilised SCSS and Element Plus for application styles.
- Implemented state management in large–scale applications using Vuex and Pinia.
- Tracked Sentry records.
- Implemented new frontend standards such as Pinia, TypeScript and Storybook.
- Run agile meetings such as retrospective, planning, review and refinements.
- Presented new features on DEMO.
- Presented frontend topics on dev talks.
- Participated in adjusting agile processes.
- Responsible for introducing new frontend developer to project and company.
